

Financial Institutions are always looking for a way to differentiate the look of their payment card. One current concept is to use a “Colored Core PVC” so that the card color will stand out in the card holder’s wallet.

Buying Colored Core PVC can be expensive and requires large purchases of raw PVC material.

Now there is an alternative. Catalyst offers “GET Color™”. You don’t have to order large quantities of raw material. We add color to the edge of the card utilizing our Gilded Edge Technology™ and allow you to select from one of our standard color choices.

Spice up your card by adding “GET Color™” to your card program and make sure your card stands out from the other cards in the wallet!

Yellow	108 C		Grey	425 C	
Orange	165 C		Grey Matte	425 U	
Red	1797 C		Black	419 C	
Purple	511 C		Black Matte	419 U	
Blue	7462 C		Bright Silver	877 C	
Green	561 C		Silver Rainbow		
Crème	7504 C		Gold		

**All four edges of the card are color coated.**

Gilded Edge Technology™ is applied to the card with a colored foil, similar to the way embossed numbers are tipped with a colored foil when the card is personalized, excessive friction may cause the edged color to change or be removed, normal usage should not affect the colored edge.
